GELATINE-BASED BIOPLASTIC

RENEWABLE - (COMPOSTABLE) - REUSABLE

[www.amsterdamus.com](http://www.amsterdamus.com)

### INGREDIENTS & TOOLS:

- Gelatine powder - 24 gr
- Glycerine - 4 gr
- Water - 120 ml/gr
- A large round coffee filter

Tools: scale, pot, spoon, flat surface for casting

### THIS IS A VARIATION ON:

Bioresin by Cecilia Raspanti.

No variations.

### MAKING PROCEDURE:

- Measure ingredients
- Bring water to the boil, add gelatine and glycerine
- Simmer at 80 degrees Celcius, while stirring very slowly.
- Take off the heat when it is thick like syrup, absorb froth with coffee filter
- Cast onto surface and let it dry overnight
- Airdry until no longer cold to touch, keep pressed

Re-usable by re-melting. Not suitable for home composting.
