### INGREDIENTS & TOOLS:

- 100 g grated beetroots
- 150 g water
- 1 tbsp vinegar
- 48 gr gelatin
- 8 gr glycerine

Tools: Pot, Stove, Spoons, Scale,  
Molds, Jars

### THIS IS A VARIATION ON:

Bioresin by Cecilia Raspanti

Changes made: dyed the solvent with  
beetroot dye.

### MAKING PROCEDURE:

- Dye the water, by boiling the  
beetroot for at least 10 min
- Strain out the beetroot
- Add glycerine and then gelatin  
to the dyed water
- Simmer for 15- 20 min, until  
thick like syrup.
- Add the vinegar
- Prepare molds
- Pour slowly in molds
- Dry

Not suitable for home composting.  
Reusable by reheating and recasting
