All countries of the world signed the United Nations Agenda 2030. We give you a brief introduction to this Agenda of 17 Sustainable Development Goals (SDGs). Based on this, you will select the 3-4 goals that best suit your local fablab. We call this the SDG profile of a fablab. To get a better picture of these goals, you also view the underlying subgoals (targets). You check which activities your fablab is already performing and to what extent they fit in with the selected goals (and their subgoals). You then check whether you could adjust your activities so that they fit your SDG profile even better. You will submit your profile and put it on the map. Together we look at whether the map with profiles reveals new possibilities for the fablab network. Ultimately, you prepare an action list for when you are back in your own local fablab. We record and share all results.
